WORK EXPERIENCE

Fullstack Developer Intern | PT Citiasia International — East Jakarta

Aug 2025 – Dec 2025

- Contributed to Smart Village Ecosystem and Sirkular App, supporting village digitalization and waste management services.
- Developed Laravel-based REST APIs and admin CRUD modules (users, collectors, customers, areas, articles) with authentication and role-based access control.
- Integrated Midtrans Snap payment gateway handled invoice and webhook logic, and improved billing flow and backend modules.
- Deployed applications to production server using Microsoft Azure VM.

Stack: Laravel, Flutter, PHP, Dart, Midtrans, MySQL, RESTful API, Azure VM

Automation Bot Developer (Freelancer) | PT Violet Global Indonesia — Semarang City

Feb 2025 – Mar 2025

- Built automation bots integrated with internal business tools to streamline repetitive workflows.
- Reduced manual task overhead significantly, improving overall workflow efficiency.

PROJECT EXPERIENCE

Handycraft Marketplace — Sentra IKM Karya Maju Bersatu

Mar 2026 – Present

- Built premium multi-vendor e-commerce platform connecting handicraft artisans (IKM) with buyers using decoupled architecture (Laravel 13 API + Next.js 16 frontend).
- Implemented hybrid token authentication with Laravel Sanctum, Spatie Permission (roles: buyer, seller, admin), and Google OAuth via Socialite.
- Integrated Xendit (Invoice, Webhook, Disbursement API) and RajaOngkir with Redis caching; built escrow wallet with auto-release after buyer confirmation.
- Set up real-time WebSocket with Laravel Reverb, admin panel with Filament v3 + 2FA, and monitoring via Horizon, Pulse, and Telescope.

Stack: Laravel 13, Next.js 16, TypeScript, MySQL, Redis, Tailwind CSS, Shadcn UI, Xendit, Docker, Azure VM

Smart Village Ecosystem | PT Citiasia International

Aug 2025 – Sep 2025

- Developed village digitalization platform with village profile website, local government dashboard, and community mobile app.

Stack: Laravel, Flutter, PHP, JavaScript, Leaflet JS, Dart, MySQL.

- Built waste management platform connecting collectors and citizens via admin web panel and mobile app.

Stack: Laravel, Flutter, PHP, Dart, Midtrans, RESTful API, Leaflet JS, MySQL.

[Diara TimeSchool](#)

Mar 2025 – Jul 2025

- Contributed to a web application for student attendance management, achievement points, and student violation tracking, built on a collaborative PBL template at Politeknik Negeri Semarang.
- Containerized the application using Docker for consistent development and production environments.

Stack: Laravel 11, PHP, JavaScript, MySQL, Docker

[Waste Detector App](#)

May 2025 – Jun 2025

- Built Android app for real-time waste classification (organic/inorganic) using on-device TensorFlow Lite model with offline functionality.
- Trained and exported ML model using TensorFlow/Keras with quantized TFLite for mobile inference.

Stack: Flutter, Dart, Python, TensorFlow, TensorFlow Lite, Keras

[Smart Irrigation System](#)

Jun 2025 – Jul 2025

- Developed mobile app integrated with ESP32 for real-time soil moisture monitoring and automatic/manual pump control via Firebase Realtime Database.

Stack: Flutter, Dart, C++, PlatformIO, Firebase, IoT, ESP32

[ArenaConnect App](#)

Sep 2024 – Dec 2024

- Built mobile application for booking futsal and badminton courts, connected to a dedicated REST API backend (Arena-Connect-API).

Stack: Flutter, Dart, REST API, Laravel, MySQL

[Plant Disease Detection](#)

Jun 2026

- Built a plant disease detection system combining a Python/TensorFlow ML pipeline (EDA, training, fine-tuning, evaluation) with a Flutter mobile app for on-device inference.
- Produced confusion matrix, training curves, and training logs to evaluate model performance.

Stack: Python, TensorFlow, Keras, Jupyter Notebook, Flutter, Dart

ORGANIZATION EXPERIENCE

Human Resource Development Division | Korps Sukarela PMI — Semarang

Dec 2023 – May 2026

- Assisted in planning and executing humanitarian aid missions.
- Coordinated volunteer deployment with PMI and external partners.
